Copyright is a form of protection provided by the laws of the United States (title 17, U.S. Code) to the authors of "original works of authorship" that are fixed in a tangible form of expression. The fixation need not be directly perceptible, so long as it may be communicated with the aid of a machine or device. Copyrightable works include the following categories: Literary Works (computer programs, compilations, periodicals, articles, fiction, drama, written speeches etc.) Pictorial, graphic, and sculptural works (Maps, photographs, blueprints, clipart, as well as traditional art types).

Copyright protection is available for published and unpublished works. It gives the owner of copyright the exclusive right to do or authorize others to do the following:

© Reproduce the copyrighted work
© Prepare derivative works based upon the copyrighted work;
© Distribute copies of the copyrighted work to the public by sale or other transfer of ownership, or by rental, lease, or lending;
© Perform the copyrighted work publicly, in the case of literary, musical, dramatic, and choreographic works, pantomimes, and motion pictures and other audiovisual works; and
© Display the copyrighted work publicly, in the case of literary, musical, dramatic, and choreographic works, pantomimes, and pictorial, graphic, or sculptural works, including the individual images of a motion picture or other audiovisual materials.

It is illegal for anyone to violate any of the rights provided by the Act to the owner of copyright.

Fair Use

Sections 107 through 119 of the Copyright Act establish limitations on the rights of the copyright holder. These limitations cover various uses of copyright materials. The one that is most likely to affect Genealogical Societies, not only in newsletters and web sites but also in materials put into libraries or passed out at seminars and lectures, is that of FAIR USE. Items that would be taken into consideration in determining fair use would be:

© The purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes;
© The nature of the copyrighted work [if the use is similar to the intended use of the work, it is not likely to be considered fair use];
© The amount and substantiality of the portion used in relation to the copyrighted work as a whole; and
© The effect of the use upon the potential market for or value of the copyrighted work.

Copying an article in full would seldom be considered fair use, but might be in the case of a nonprofit educational purpose. Even if it would fall under the classification of fair use, courtesy should dictate that you contact the copyright holder and ask for permission to use the same. The same should hold true for the placement of a photocopy of a copyrighted article in a library. Copying one page of a hundred might or might not be considered fair use. Common sense should help you decide, and again what is the harm in contacting the copyright holder for permission? Copying a sentence (with full bibliographical reference) from a full article or book would nearly always be considered fair use as long as there is no loss to the copyright holder (This might not hold true if the sentence is the total or near total work).

Use of a picture, cartoon or illustration that is covered by copyright is seldom fair-use.
Length of Copyright

Copyright protection exists from the time a work becomes fixed: the picture is taken; the article or book is written; the clipart created, etc. The copyright of the work immediately becomes the property of the creator. Only the author or those deriving their rights through the author can rightfully claim copyright.

2. Works Published **Before 1923** are in the Public Domain

3. Works Published **after 1923 but before 1978**
   a. Copyright protection required inclusion of name, year, and word or symbol for copyright (notice of copyright).
   b. Initially good for 28 years, renewable for up to 67 years (the last 20 years were added in 1998).
   c. 1923-1963 - maximum of 95 years, but only if the copyright was renewed.
   d. 1964-1977 - automatic renewal of copyright - life of author plus 67 years or 2002 whichever is greater

4. Works Published **after Jan 1, 1978**
   a. Life of the creator plus 70 years, or until 12-31-2047 whichever is later.
      i. Old copies might not have the notice but are still protected.
      ii. After Mar 1989 no notice of copyright is required.
   c. If there is more than one creator, the one who lives longest dictates life of copyright.
   d. Multiple works and anonymous works are treated like multiple authors.
   e. Corporate Authorship – shorter of 95 years from publication or 120 years from creation.

5. **Unpublished Works**
   a. A work is considered to be published when it enters the public forum.
      i. Print
      ii. Electronic format
      iii. Manuscript collection with public access
   b. Life of the author plus 70 years - [death before 1941]
   c. Anonymous / corporate/ author death date unknown - 120 years from creation [1891]
Who Owns the Copyright

© In the case of works made for hire, the employer and not the employee is presumptively considered the creator. Section 101 of the copyright statute defines a "work made for hire" as:
© A work prepared by an employee within the scope of his or her employment; or
© A work specially ordered or commissioned for use as a contribution to a collective work
© The authors of a joint work are co-owners
© Copyright in each separate contribution to a periodical or other collective work is distinct from copyright in the collective work as a whole and vests initially with the author of the contribution . . .
© Mere ownership does not give the possessor the copyright.
© Minors may claim copyright, but state laws may regulate the business dealings involving copyrights owned by minors.
